[Borehole Completed in Remote Zambia](#)

[Annual Report for 2014 Available](#)

To our LifeNets Supporters and Friends!

Again, we extend a huge thank-you for your interest in the life-changing work of LifeNets. We are entering our 17th year of operation. We are thankful to God, to you and to the people on the ground in all the places we work who properly distribute the aid that has been generously entrusted to us.

In this newsletter we have but a few of the stories that have brought positive change in the lives of challenged and vulnerable people. As you see, the programs we offer are varied: water, cattle, scholarships, clothing, wheelchairs and much more. My husband and I have traveled to many of these areas and have developed personal relationships with responsible people who have made certain that your gift is given as you intended.

Bev Kubik

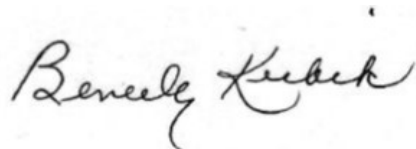

Our expenses are minimal. We don't spend anything on fundraising. Most of our workers are volunteers. Also, we thank Ambassador Bible College and those doing garage sales, greeting card fundraisers and other activities to help us out. We thank all the churches who have donation jars for LifeNets.

The taxable year is coming to an end in a few days. You can still make a tax-exempt donation by going to our LifeNets website <http://lifenets.org> and making a donation via credit card or PayPal.

Again, my husband and I as well as the entire LifeNets Board of Directors thank you with all our hearts for your trust in us.

Thank you for making LifeNets the charity of your choice.

Our love and best wishes to all of you!

Beverly Kubik  
President

### **Scholarship Student Graduate in Malawi Gets a Great Job**

The LifeNets Developing Nations Scholarship Program continues to make positive life altering changes in the lives of so many young people who now have hope for more than a life of subsistence living. One of our scholarships students Chifundo Njewa writes this:

"Bev, I have found a job. I am working for the Malawi government for the ministry of transport and public works as a motor vehicle mechanic in Dedza. I do appreciate LifeNets sponsorship that made me to get to where I'm at. May God bless you abundantly. I attend church services once or twice per month because from Dedza to Lilongwe is a journey of three hours using a bus. My mum is doing very well and I regularly call her. "

We are proud of Chifundo for achieving this skill and having a great job now. His mother was recently widowed. We have visited them at their home several times on our visits to Malawi.

### **Clothing and School Items to Street Children in India**

LifeNets assists in sending clothing and school items to street children in India through church and pastor in SE Minnesota who regularly travels to India and make certain is properly distributed.

The boxes of clothing (including school supplies for the two orphanages in India) were sent to the Andhra Pradesh area. Since the clothing is donated and coming from garage sales, resale shops or personal family donations - the cost of the clothing is minimal.

More detail about this wonderful gesture of kindness and love for these children is told on our Website at <http://lifenets.org/india/clothing2015.html>.

### **Kids 4 Cows Delivers Another Cow**

---

LifeNets Kids 4 Cows program delivers "Bella" to the Gomez da Silva family in Maloca de Moscou area of northern Brazil. This has been a great program connecting children from the US to children in developing areas. More photos and story at <http://lifenets.org/kids4cows/brazil2015.html>

### **Borehole Completed in Remote Zambia**

---

LifeNets is pleased to announce that a MUCH NEEDED borehole to serve an orphanage and a community was finally completed in remote Mufumbwe, Zambia in early September 2015.

In October 2014 we met Vladimir Badaliy who offered to finance a borehole in Africa. We decided that putting a borehole here where there are almost none would be a tremendous blessing. The borehole would have to be dug in winter, the dry season which in Zambia is June through August. We searched for drillers who would go to this area. To our dismay there were few who were even interested in going and quoted outrageous prices and terms to even go. Finally, towards the end of winter in August we were able to arrange with a driller to go out there for a reasonable price which included a hand pump. We also had to purchase the plot of land on which the borehole was drilled. LifeNets Australia helped us that. The dimensions are 100 by 100 meters. The location was good right in the town of Mufumbwe.

Derrick Pringle writes to us on September 16::

"With only a hand pump the water came out crystal clear. At the moment the pump is chained and locked until we can build a temporary dwelling for Christopher. He will cultivate a garden there and also supervise the correct use of the pump. I am pleased about that as I have great difficulty in communicating with him where he presently lives. I left cash with them to purchase cement and bricks for a waterway from the pump to a washing bay."

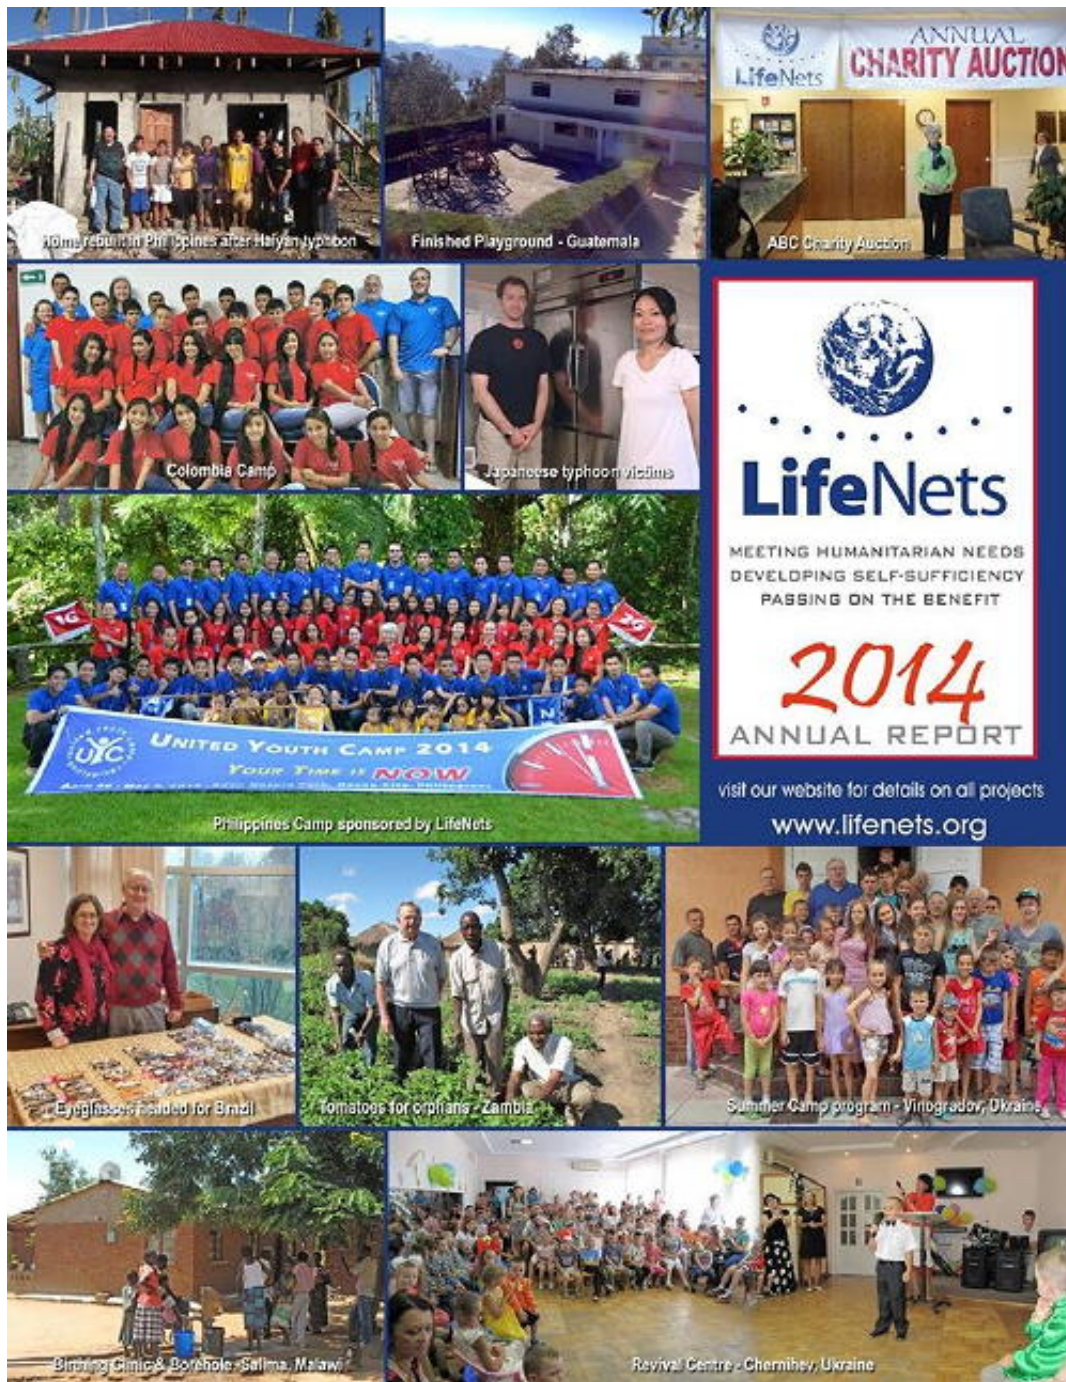

Read the whole story on our Website at:

### Annual Report for 2014 Available

This report covers the major activities of LifeNets and reports about our income and where we spend the money so generously donated to us in the previous year. The highlights of 2014 were Philippines Haiyan Typhoon rebuilding, wheelchairs, boreholes, scholarships, partnering with Youth Corps workers in Guatemala and much more. See and/or download the PDF report at
