MAKING REHAB A BETTER PLACE

Let's face it, the words "traction" and "rehabilitation" are not ones you want to hear from the doctor. However, it is reassuring to know that the equipment used is SUPERBly made.

Exclusive Partner

After undergoing an extensive evaluation process, FDA registered SUPERB, was selected to provide traction solutions for a global health care company. As the sole source partner for the company's health care industry's traction products, the SUPERB medical team puts superior quality at the forefront of each component it manufactures.

For the medical team, it is more than "just" components they are manufacturing; they are assisting in patients' rehabilitation. So if the medical team can produce top quality items for hospital beds for patients from infants to adults, their job is quite meaningful.

There is a prescription for a safer, faster, and better rehabilitations process—and it all begins at SUPERB.

Exact Manufacturing

Using stainless steel, aluminum, steel, and brass, the SUPERB team receives the blueprints for parts from the customer and then develops a process to manufacture the pieces for each traction mechanism, according to its specifications. Exact tolerances and strict manufacturing guidelines are used with each assembly and subassembly. From there, each traction solution passes a quality inspection prior to being shipped.

FDA registered SUPERB produces around 150 finished medical goods and hundreds of subassemblies for those finished goods. The medical team takes pride in each component it produces because the health and safety of patients across the globe is at stake. It is SUPERB's chance to make rehab a little bit better with every traction solution provided.

OPERATION **COVID-19**

LEVERAGING THE POWER OF COMMUNITY

Hotline: (419) 884-6170

Operation STOP COVID-19 is a community effort led by SUPERB Industries, INC. and Stitches USA LLC. to provide products to support the national effort to bring the COVID-19 crisis under control.

[Stitches USA](#) is a commercial sewing operation that manufactures American flags, high temp hazmat suits, and equestrian gear. These resources have been reallocated to support the fight against the COVID-19 epidemic. We are scaling production rapidly and are flying in materials to ensure adequate supply—we have over 10,000 seamstresses within thirty miles.

[SUPERB Industries, Inc.](#) is a Class I FDA registered, ISO9000 and IATF16949 certified manufacturer of engineered products that shipped 1.6 billion components to global customers in 2019. The FDA Class I business unit specializes in hospital bed related components and has Swiss turning, injection molding, and high speed stamping capacity available to support the COVID-19 crisis. Government agencies and commercial customers needing these resources, should call our

[Operation STOP COVID-19 Hotline \(419\)884-6170.](#)

SUPERB and Stitches are located in a community renowned for disaster relief efforts and are founding members of Developing Excellence—a business owners group established 16 years ago. During this time of crisis, we are pooling resources to support our fellow citizens and each other. Collectively we have over 5,000 employees many of whom have been laid off and can be redeployed to support **Operation Stop COVID-19.**
